

# PRODUCT PORTFOLIO

## EUROPE

# WHO WE ARE

BH SENS is one of the world's largest suppliers of tire pressure monitoring systems and is characterized by the highest Made in Germany quality and a familiar working atmosphere. We have been helping to increase road safety and reduce environmental pollution **for over 25 years** and supply almost all well-known vehicle manufacturers.

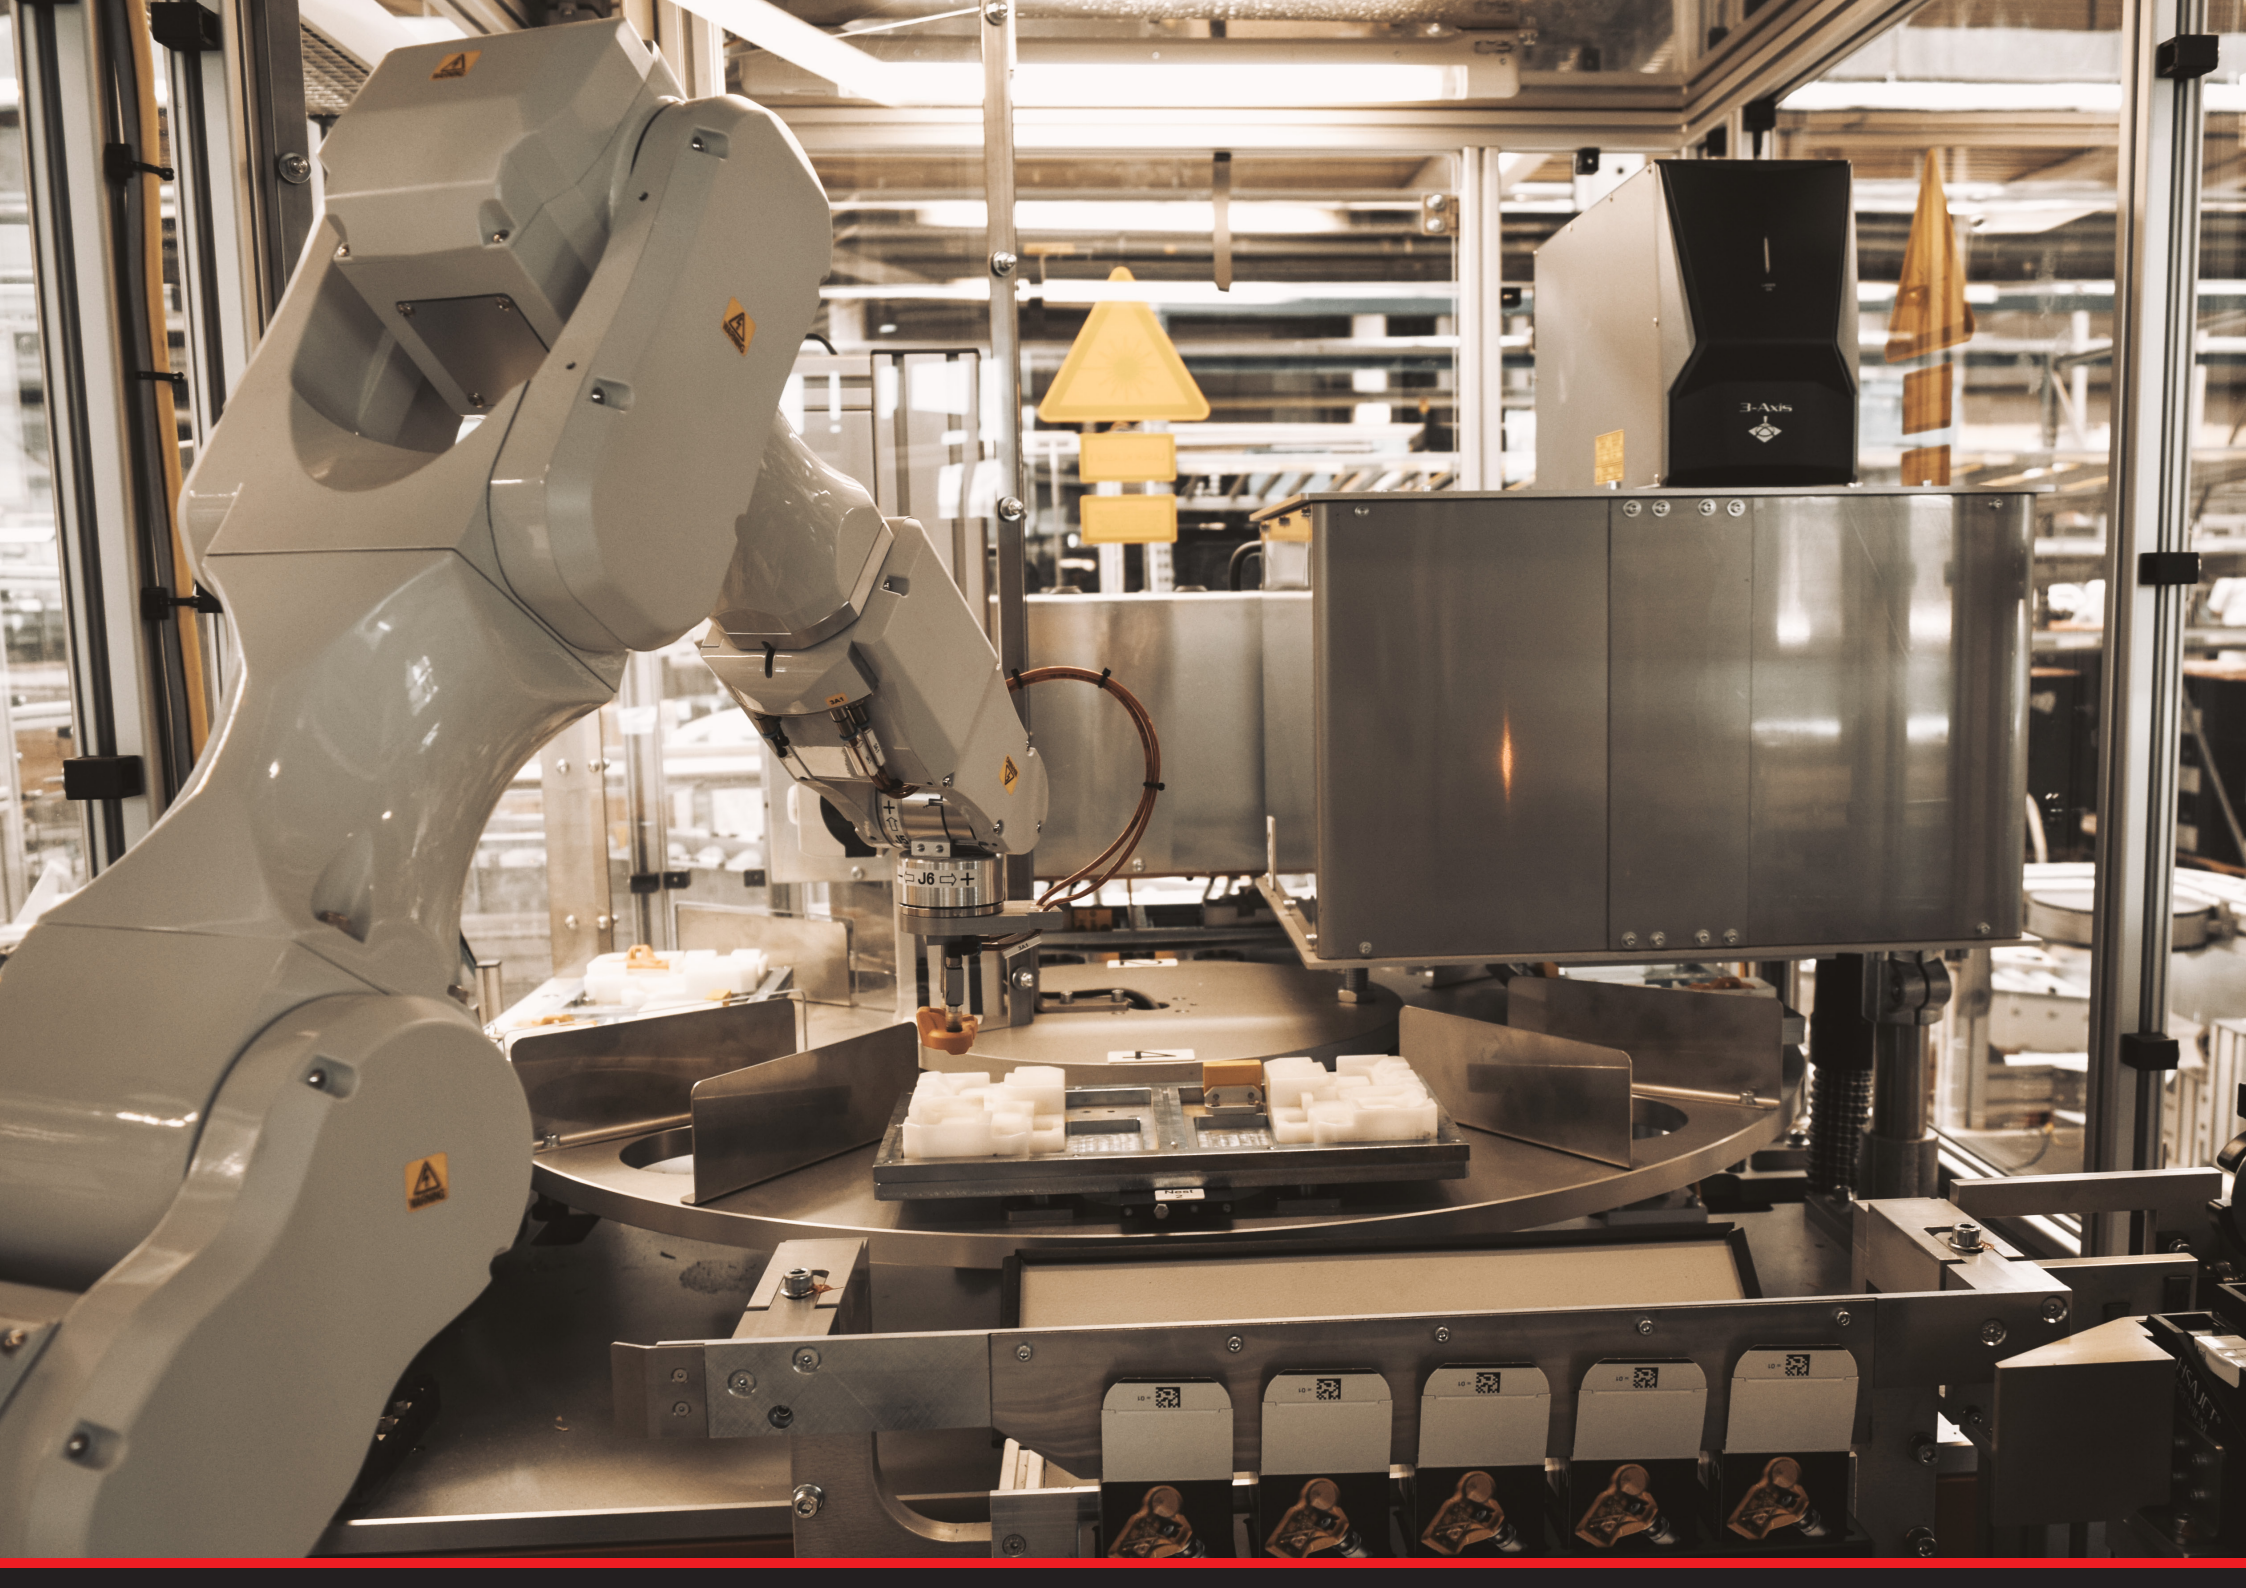

With our TPMS sensors from IntelliSense, we bring OEM quality to the Independent Aftermarket. Optimized for the needs of the independent workshop, we offer various universal sensors and original replacement sensors - **IntelliSense is always the best choice.**

# OUR VALUES

Safety is a matter close to our hearts.

*Our products increase road safety and help to reduce the number of traffic accidents.*

We take responsibility for our environment.

*The eco-friendly and efficient use of resources is important to us.*

We stand up for humanity and solidarity.

*Mutual respect and appreciation is the motto of our BH SENS family, whose members support each other and engage locally.*

Our values strengthen our partnerships.

*We are a reliable, trustworthy business partner. Honesty and loyalty are the cornerstones of a successful working relationship.*

Our flexibility guarantees solutions.

*Short decision-making processes and rapid implementation ensure maximum satisfaction for all parties involved.*

We stand for quality without compromise.

*Our products are characterized by high standards, absolute value and our endeavors to ensure that we never receive a complaint.*

# UNIVERSAL SENSORS FOR PASSENGER CARS

**Maximum flexibility:** With the IntelliSens universal sensors UVS and ECS, BH SENS offers two types for different requirements. The universal sensors have a large number of protocols pre-installed and only need to be activated and relearned to the vehicle. With the update function, future vehicle protocols can also be programmed onto the sensor via a TPMS diagnostic tool.

- ✓ **Extended battery life through patented technology**
- ✓ **Easy to install**
- ✓ **Meets all OE functions and Quality**
- ✓ **Over 97% vehicle coverage**

## UVS universal sensors

- OE design
- Metal valves with adjustable angle
- 3 years warranty

## ECS universal sensors

- IAM design
- Valves pre-mounted
- 2 years warranty

# ORIGINAL REPLACEMENT SENSORS FOR PASSENGER CARS

**Wide selection:** With the RDE and ECR sensors, BH SENS offers two types for different requirements. The pre-programmed TPMS sensors already have the vehicle-specific protocol pre-installed and no longer need to be programmed. After installation, the relearning to the vehicle is mandatory. The RDE and ECR sensors only fit the vehicle types specified in each case. Reprogramming is not possible.

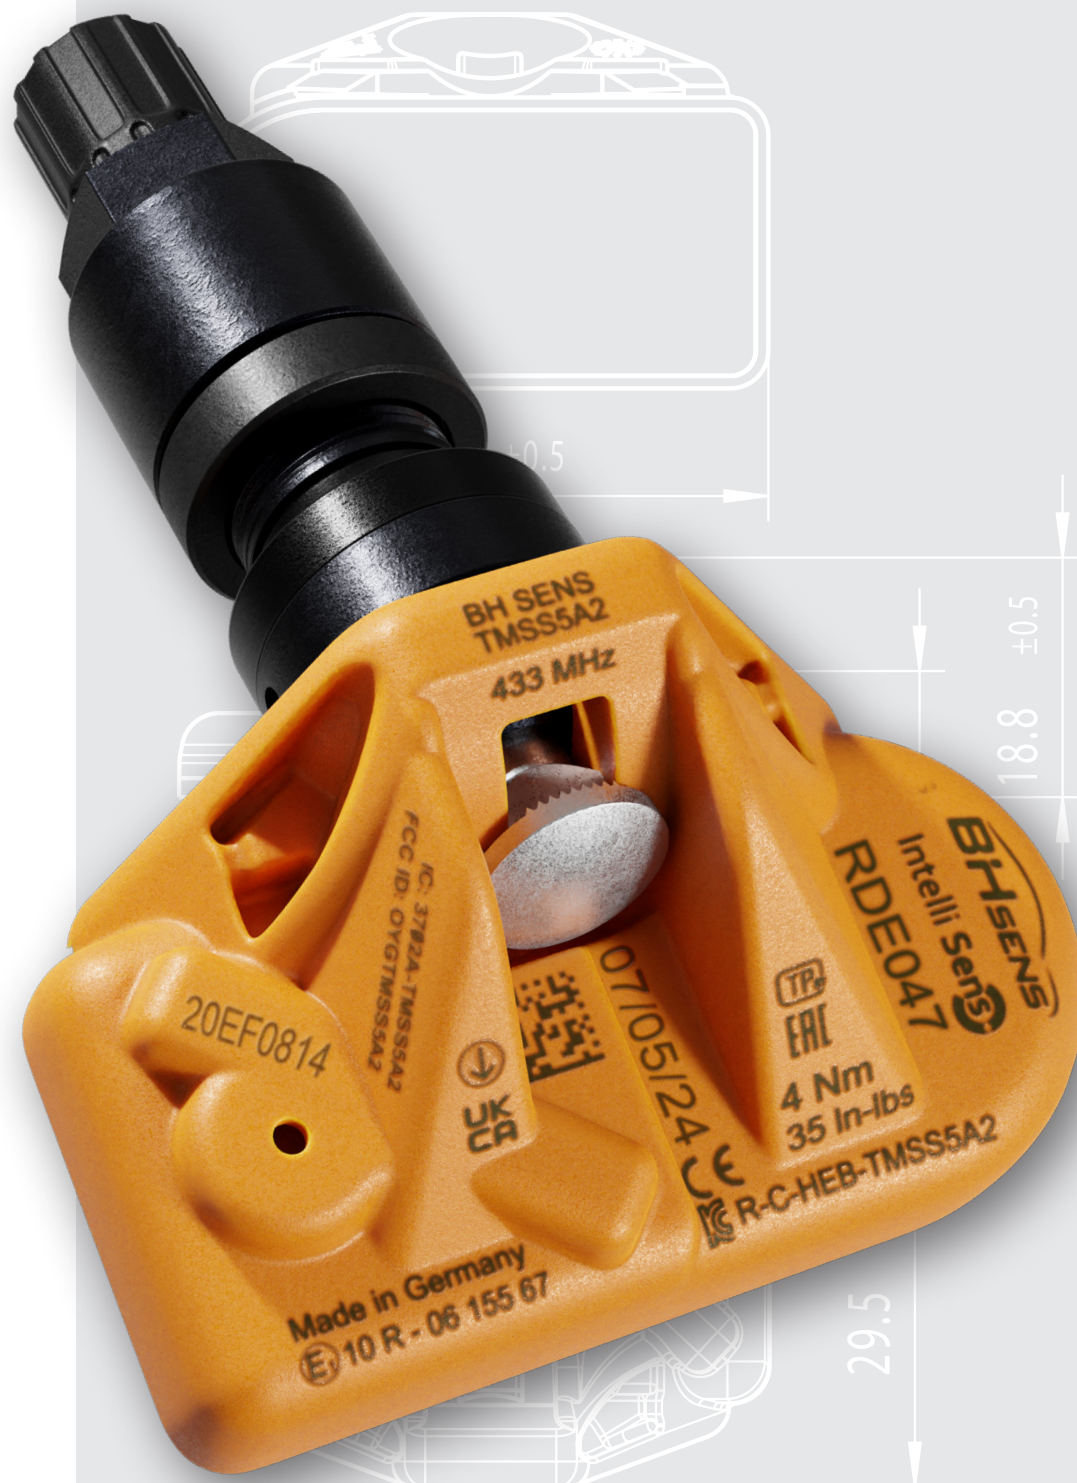

- ✓ Ready out of the box - no programming required
- ✓ Meets all OE functions and Quality
- ✓ Easy to install
- ✓ Extended battery life through patented technology

## RDE original replacement sensors

# TPMS SENSORS FOR COMMERCIAL VEHICLES

**Hybrid solution:** The innovative universal sensor UVS02HD-Hybrid from BH SENS can be fitted using either a valve or a textile strap. In combination with a high coverage for various trucks and trailers, the UVS02HD-Hybrid is the most flexible solution on the market that meets all OE requirements. Because of the update capability, new vehicle covers can also be programmed onto the sensor in the future.

## UVS02HD-Hybrid

- OE quality
- Simple installation (via valve or textile strap)
- Fast to program
- High coverage

**Wide range of sensors:** BH SENS offers various RDE types which already have the vehicle-specific protocol pre-installed. This eliminates the need for programming and the TPMS sensors only need to be relearned. Reprogramming is not possible.

## RDE original replacement sensors

- OE design
- Different types
- No programming necessary
- Original replacement sensor

**Hybrid mounting concept:**  
Can be fitted using either a valve or a textile strap.

RDE021  
73900021

The textile strap for the UVS02HD-Hybrid from BH SENS is the perfect addition to the universal sensor. It is preferably used for truck trailers, where the TPMS OE sensors are often mounted with a strap and not on the valve. The BH SENS strap is available in various sizes - we have deliberately decided against a universal strap solution. A strap that is too long wastes resources and can lead to increased wear on smaller wheels.

**Textile strap**

Did you know...? BH SENS offers truck upgrade kits (part number in brackets) for the following TPMS diagnostic tools: VT56 (73906351), DT57 (73906352) and VT67 (73906353). These include a software license to select truck models and a 24V OBD adapter. This means that a TPMS service can be guaranteed for cars and trucks. The DT24HD from BH SENS can be used purely as a TPMS diagnostic tool for trucks.

# TPMS DIAGNOSTIC TOOLS

BH SENS offers various diagnostic devices for a professional TPMS service. These can be used to read out and program TPMS sensors and relearn them to the vehicle.

**DT41 - The perfect solution:** Programs all universal sensors produced by BH SENS. It includes the integrated OBD module and 5 years of updates.

- For cars and two-wheelers
- Read out of all OE and replacement sensors
- Programs all universal sensors produced by BH SENS
- Integrated OBD module with cable
- Supports all relearning procedures with step-by-step instructions
- 22 supported languages
- Incl. 5 years software license

**DT41**  
73906206

**DT47+BLE**  
73906222

**DT47+BLE - The universal all-rounder:** Programs more than 20 universal sensor brands and, in addition to the integrated OBD module, also includes a 3-year multi-brand software license.

- For cars and two-wheelers
- Read out of all OE and replacement sensors (+BLE)
- Programs >20 universal sensor brands
- Integrated OBD module with cable
- Supports all relearning procedures with step-by-step instructions
- WLAN for updates
- 22 supported languages
- Incl. 3 years multi-brand software license

**DT57+BLE - The advanced all-rounder:** The intuitive and icon-based menu navigation including touchscreen enables the reading of all OE and replacement sensors (including BLE).

- For cars and two-wheelers - Truck-Upgrade-Kit available
- Intuitive and icon-based menu navigation incl. large touchscreen
- Read out of all OE and replacement sensors (+BLE)
- Programs >20 universal sensor brands
- Wired OBD module
- Supports all relearning procedures with step-by-step instructions
- WLAN for updates
- 22 supported languages
- Incl. 3 years multi-brand software license

**DT57+BLE**  
73906223

**VT67**  
73906209

**VT67 - The innovative tablet tool:** The icon-based innovative touchscreen menu navigation makes it quick & easy to read out all OE and replacement sensors and to program more than 20 different universal sensor brands. The VT67 is based on Android, has Bluetooth and WLAN.

- For cars and two-wheelers - Truck-Upgrade-Kit available
- Android operating system
- Intuitive touchscreen menu navigation - icon based
- Read out of all OE and replacement sensors
- Programs >20 universal sensor brands
- Supports all relearning procedures with step-by-step instructions
- Integrated OBD module with cable
- WLAN for updates and transferring reports
- Bluetooth
- Camera and light
- Shows all images from the OE sensor and service
- 22 supported languages
- Incl. 2 years multi-brand software license

**DT24HD - Die ideal truck solution:** Activates the TPMS sensors of common truck and bus brands and programs the universal truck sensors from BH SENS.

- For trucks and trailers
- Read out of all OE and replacement sensors
- Programs the universal truck sensors from BH SENS
- Integrated OBD module with cable
- Supports relearning procedures for common truck and bus brands
- Manages and stores data from up to 22 wheels
- Incl. 3 years software license

# TPMS SERVICE KITS

In a good vehicle service, the tire valves should be replaced professionally every time the tires are changed. The same applies to the service parts of the TPMS sensor (e.g. valve insert and valve cap as well as hex nut and rubber seal).

Discover our comprehensive range of TPMS service kits now, which are also suitable for other manufacturers (TPMS sensor brands).

Everything from a single source - BH SENS is your TPMS supplier.

Service kits flyer

## DISCOVER THE BENEFITS OF THE UNIVERSAL TPMS SERVICE KIT USVK01:

### Flexibility

A universal solution for up to 20 different service kits

### Coverage of the market

97% of the market coverage of all TPMS sensors with metal valve

### Cost reduction

Reduces stock levels and cuts costs

**BH SENS always recommends replacing the complete valve**

### The universal TPMS service kit from BH SENS:

Ideally equipped and suitable for the most frequently used TPMS sensor service parts in a comprehensive service kit.

Mounting instructions

The simple handling and application is explained step by step in the detailed installation instructions and guarantees worry-free installation.

### TPMS SERVICE KIT USVK01

Part number	73908021	
Reference number	0401-0022-482	
Suitable for	Sensors of BH SENS, Continental, Pacific, Schrader, TRW	
Hex nut torque	4,0 Nm	

# IMPORTANT NOTES

Carefully read the installation instructions and safety notes before installing the sensor. Reproduction mistakes, errors, and changes reserved. Illustrations may differ from the products.

IntelliSens Tire Pressure Sensors and valves are precisely tailored to each other. We therefore recommend to use the Tire Pressure Sensor only in connection with the IntelliSens valves. If you use the Tire Pressure Sensor in combination with other products that have not been certified or tested by IntelliSens, the Tire Pressure Sensor may not work correctly and safety or quality problems cannot be excluded.

**Warning:** IntelliSens Tire Pressure Sensors and valves are for professional installation only. Improper installation of IntelliSens Tire Pressure Sensors can cause the IntelliSens Tire Pressure Sensors to malfunction, which can cause serious injury and even death. IntelliSens Tire Pressure Sensors are replacement or maintenance parts for motor vehicles that have a factory installed Tire Pressure Monitoring System (TPMS). This system does not replace the need for regular maintenance of the tire pressure and tire conditions.

Do not use the sensor if it is damaged and/or other visible defects are present. In this case, use a new sensor and contact your supplier's customer service. Mounting machines, valves, tools and processes might vary.

Please note: maybe not suitable for Runflat tires, UHP tires, and Michelin Pax®-tires. This catalog was created with the highest level of accuracy at the date of publication. Nevertheless, the use of tire pressure sensors is the responsibility of the vehicle manufacturers. For this reason we cannot accept any liability for incomplete or incorrect data in this catalogue. The model-specific coverage and reference list is updated on a regular basis and can be found within the BH SENS Product Finder on [bh-sens.com/produktfinder](https://bh-sens.com/produktfinder).

In any case, the regulations of the respective vehicle manufacturer have to be obtained! Reproduction of this print product, even partial reproduction, is only allowed with the publisher's consent and with a clear list of references.

All former TPMS product catalogues and portfolios are herewith no longer valid.
